ABOUT

Developed since 2004

Fine art series are constructed due the method of oil painting from Van Eyck through Rembrandt to impressionism.

The carefully built structure of each piece applying extreme diversity of non printable colors in millions of shades guarantee the apperance unlike any commercial material.

It's concept and visual properties make ARCHT art series a sophisticated instrument created for emlematic jobs.

CONCEPT

MODULAR LIMITED EDITION FINE ART series

Our patented technologies allow each piece to be unique in its details applying intense interactions with the light.

Within its metallic color range there are many strong and pastellish colors beyond. hundreds of shades of gold, copper, silver and bronze tones.

Each piece is designed to project colorful iridescent reflections. Due to its properties actively interacting with the lights of its environment, tiles add naturally vivid atmosphere to any interior.
